

MARKED VERSION OF AMENDED CLAIMS - 50574

3. Ink-jet inks as claimed in claim 1 [or 2], including as component (C1) one or more polytetrahydrofurans having an average molecular weight M_w of from 150 to 500 g/mol.
4. Ink-jet inks as claimed in claim 1 [any of claims 1 to 3], including from 1 to 10% by weight of said component (C1) and from 1 to 30% by weight of said component (C2).
5. Ink-jet inks as claimed in claim 1 [any of claims 1 to 4], including as component (C2) one or more solvents selected from the group consisting of polyhydric alcohols, polyethylene glycols, polypropylene glycols, polyethylene glycol monoalkyl ethers, polypropylene glycol monoalkyl ethers, pyrrolidone and N-alkylpyrrolidones.
6. Ink-jet inks as claimed in claim 1 [any of claims 1 to 5], including as component (C2), in each case based on the weight of the preparation, from 1 to 10% by weight of glycerol, sorbitol and/or propylene glycol, from 1 to 10% by weight of polyethylene glycol having an average molecular weight M_w of from 300 to 500 g/mol and from 1 to 10% by weight of di- and/or triethylene glycol mono-C₁-C₄-alkyl ether.
7. Ink-jet inks as claimed in claim 1 [any of claims 1 to 6], including as component (A) a finely divided organic or inorganic pigment.
8. Ink-jet inks as claimed in claim 1 [any of claims 1 to 7], including as component (B) a dispersant based on arylsulfonic acid-formaldehyde condensation products

MARKED VERSION OF AMENDED CLAIMS - 50574

(B1), on alkoxyated phenols (B2) on condensation products of an at least difunctional isocyanate with compounds (B3) each bearing one isocyanate-reactive group, on alkoxyated hydroxynaphthalenes (B4) or on alkoxylation products of at least difunctional aliphatic or aromatic amines having up to 8 carbon atoms (B5).

9. Ink-jet inks as claimed in claim 1 [any of claims 1 to 8], further comprising urea and a polyether siloxane copolymer.
10. Ink-jet inks as claimed in claim 1 [any of claims 1 to 9], further comprising a thermally or radiation-chemically curable binder.
11. A process for printing sheetlike or three-dimensionally configured substrates by the ink-jet process, which comprises printing colorant preparations as set forth in claim 1 [any of claims 1 to 10] onto the substrate and, if desired, subsequently fixing the print obtained.
